Shannon/Gina:

It appears to be a pretty compressed timeline. There was only one date on the spreadsheet that stated that AD would have the Risk Assessment back to BPPD by August 30. Everything else is blank.

There are four Hazard/Risk Assessment steps for AD to accomplish between now and 8/30. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Just be aware of my time constraints.

Hi Russ,

BPB is going to negotiate a new PRIA date for Formica acid. Can you address Gina's questions below on the proposed Aug 30 date for the risk assessments and when the specified milestones will be met?

Thanks,
Shannon

Shannon and Laura,

As a follow-up to my earlier email, attached is the specific information that I am being asked to provide to management to support the extension to Nov for the due date and Aug 30 for the RA data.

Please give me your best estimates on timing.

Thanks!
Gina

Subject: Formic acid

Hi Shannon and Laura,

For the Formic Acid package (two MPs and tow EPS), we discussed needing more than the 7 months allotted for this non-food new use PRIA action. We had decided that a risk assessment due date of August 30, 2019, was reasonable, and this would mean a renegotiated PRIA due date of late November.

I have put forward forms, in agreement with the company, to change our PRIA due date officially to November 26, 2019. However, I need your help. Management is asking specifically how much time will be allotted (between now and August 30th) for primary review in each division, secondary review (wherever that might be) and final risk assessment writing (again, where/who).

Can you please describe for me your plan to meet the August 30th science due date?

Many Thanks!

Gina
